

PIR Sensor LED Lighting Driver

HT7612(PIR Sensor) + HT7L2103(LED Driver)

Characteristics

- The HT7L2103 Drives High Power White LEDs and Includes Internal Over-temperature Protection
- T8 Tube, Vac = 85V ~ 265V, Output Power = 8.5W, Maximum Efficiency = 83%
- HT7612 is a PIR Controller Specifically Designed to Interface to PIR Sensors
- Detect Range About 5 ~ 10m
- LED Mode Selection :
 - ◆ LED Off
 - ◆ PIR Control

Application Areas

Application Circuit
